

The North Dakota Department of Health, Division of Waste Management, maintains this list of industrial and municipal solid waste landfills that may accept amounts of properly emptied, rinsed and punctured containers solely as a service.

In using this list, the Division advises interested parties to contact the facility prior to transporting waste to ensure proper handling. Any facility may refuse service at their discretion. Specific landfills may have some limitations on the amount of such waste they may accept. The Division, in providing the list, does not endorse any specific facility nor guarantee its compliance with applicable laws. The Division advises interested parties to evaluate the services and compliance status of any facility they use or plan to use to manage their wastes.
